Cosmic Education Group Expands Presence in Asia-Pacific with Entry into Singapore

Singapore, 3 October 2024 - Cosmic Education Group (CEG) is proud to announce its successful acquisition of four preschools in Singapore. With this strategic investment, CEG expands its network into Singapore and adds to its growing footprint in Southeast Asia, which includes the world's first resort-based destination school in Bali, Indonesia.

CEG Expands to Southeast Asia with the Opening of the World's First Destination School

This acquisition in Singapore solidifies CEG's position as one of the largest operators of Montessori schools in Asia, further cementing its commitment to transforming education and

better serving families across the region. With a network of 27 campuses spanning Hong Kong, Singapore, Bali, and key cities in Mainland China, CEG provides high-quality, child-centered learning experiences for children ages 0-12.

The acquired preschool campuses, located in the Singapore neighborhoods of Bishan, Bidadari, Hillview, and Ubi, will be transformed, bringing an enhanced experience for children and parents alike. "Completing this acquisition provides CEG an entry into one of the leading education markets globally. We are excited to establish roots in Singapore and look forward to serving the families here." said Steve Xu, CEG's Founder and Chief Executive Officer.

CEG's schools provide an unparalleled experience for both children and their parents, focusing on these key areas:

- Structured curriculum customised to each child: CEG offers a scientifically sequenced curriculum designed to nurture children's independence at each stage of development. Each child's path through that curriculum is driven by her interests and choices, ensuring a deep engagement throughout.
- True dual-language learning: CEG's approach to language development goes beyond the bilingual structure of many schools, offering a full-time, full-curriculum approach that immerses children in both languages and offers them choices to learn in either context.
- Exceptional experience for children and parents: CEG schools prioritize children and parents, providing an unmatched educational program for children while making it easy for busy parents to be fully engaged in their children's education, with real-time insight into daily activities and progression through the curriculum. Furthermore, CEG schools don't charge any fees that don't go we charge go 100% towards school tuition: that means no capital levies, material fees, debentures, registration fees, or other extra costs.

- Close-knit school community and big network benefits: At a CEG school, families get the advantages of an intimate school environment where everyone knows each other, while also getting the infrastructure and quality standards that come from being part of a larger network. Families enjoy the familiarity and personal connections within their campus while accessing network-wide benefits like free events for families, camps across Asia, and smooth transfers in the event of relocation.

In September, the Ubi campus underwent a successful transformation and has reopened as Nest Preschool. Nest Preschool features refreshed learning environments, enriching indoor and outdoor play spaces, and an authentic Montessori curriculum designed to meet the evolving needs of infants and preschoolers.

To celebrate this new beginning, Nest Preschool Ubi invites the local community to join for a [grand opening celebration](#) on November 16th. This exciting event marks the opening of its doors to provide a nurturing environment for young learners.

Learning environments across CEG's campuses feature thoughtfully arranged spaces with interactive materials that cater to the developmental needs of different ages, inviting children to explore and nurturing their growing independence.

Children learning English and Chinese effectively through a true dual-language learning approach.

In a vibrant Montessori classroom, our guide engages young children with hands-on learning activities that encourage interaction and foster curiosity.

Through this acquisition and the subsequent transformation, CEG is poised to enhance the "Primary One Readiness" of children in Singapore. The Montessori-based approach, with its emphasis on hands-on learning, self-directed exploration, and the development of essential life skills, equips children with the adaptability and capabilities needed to excel in the primary school system and beyond.
